

# The CMMS solution for Utilities

Manufacturing

Facility Management

Utilities

Transportation

“Maintenance Connection is a very cost effective system, for instance the time spent by our Dispatch Centre on opening new work orders and assigning teams was reduced by 65%.”

Siemens Portugal

Maintenance Connection’s CMMS software is specifically tailored to the Utilities industry. Our flexible solutions are designed to meet your needs - improving safety, reliability and compliance, maximising the efficiency of remote staff, and reducing costs through optimising work scheduling.

Our unique combination of cutting edge, cloud-based technology and service excellence makes Maintenance Connection the obvious choice for your organisation..

## Streamline your Utilities assets

Our mobile solution integrates seamlessly with GIS systems to provide instant, relevant information to those who need it - where they’re working

Ensures your organisation meets critical regulatory requirements

Our Avnet data centre is ISO 27001 certified and ASIO T4 Protective Security certified, so our cloud-based systems are proven to be highly secure and reliable

## Key features of Maintenance Connection
